

Deluxe LED Strip Sample Kits

Our deluxe kits allow you to get representative samples of the various LED strips we offer:

<u>Description</u>	<u>Part Number</u>
RGB LED Super Flat Rope Light with Controller Deluxe Sample Kit	kitrgbsf
RGB LED Strip Light with Controller Deluxe Sample Kit	kitrgb
RGB LED Strip Light with Sound-to-Light Controller Deluxe Sample Kit	kitrgbstl
RGB LED Super Flat Rope Light with 3-Channel Dimmer Deluxe Sample Kit	kitrgb3sf
RGB LED Strip Light with 3-Channel Dimmer Deluxe Sample Kit	kitrgb3
RGB ColorPlus Deluxe Strip Light Sample Kit with Controller	kitColorPlus

LED strip lighting is an extremely versatile and novel light source for accent lighting. EnvironmentalLights.com has become a leader in strip lighting due to:

- Quality (only the highest quality LEDs and other components are used);
- Product variety (including a wide selection of sample kits to experience our product);
- Service and technical support;
- Availability (almost always in stock);
- Overall system price;
- Universal power supplies—we ship all over the world same business day.

LED strip lighting is not a commodity product. We buy only the best components, and the difference is noticeable.

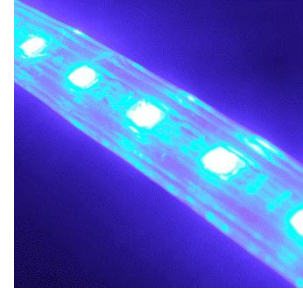

Documents

Detailed design criteria, including simplified circuit diagrams are available for the:

- Monochrome LED strips: “[monochrome_manual.pdf](#)” (available by request)
- Color-changing LED strips: “[rgb_manual.pdf](#)” (available by request)
- [PMRC controller for RGB: “pmrc.pdf”](#)
- [STL controller for RGB: “stl.pdf”](#)
- [RGB LED Dimmer \(3 channel\) - 12 or 24 VDC: “rgb-3-dimmer.pdf”](#)
- [Traxon Light Drive color controller for RGB strips: “traxon_light_drive.pdf”](#)
- [DMX decoder for DMX RGB systems: “dmx_decoder-studio.pdf”](#)

RGB LED Super Flat Rope Light with Controller Deluxe Sample Kit

This is a sample kit of our very popular Red-Green-Blue color-changing LED Super Flat Rope. Just plug it in and it works. You can use it for selling, gaining approvals, and so forth. This kit demonstrates our [PMRC controller](#) operation, including programmability, brightness, color, appearance of the RGB Super Flat Rope. You also get the waterproofing materials to become familiar with how they work.

We include a project-size power supply with this sample kit so you can easily convert it to your project after buying additional lighting. You get the sample kit for just a bit more than the controller and power supply.

[kitrgbsf](#)

Wireless Wall-Mount Remote Control

The kit includes both a wall-mount wireless and a hand held remote control, which are electrically identical. The wall-mount remote control fits in a standard gang box and uses a screw-less Decora-style decorative plate. Pop off the plate to reveal the battery compartment to enable you to replace the 27A 12 volt battery. The wall-mount is wireless and communicates with the controller using radio waves.

The kit is pre-wired and includes:

- PMRC controller
- 1 hand-held remote control, keyed to the controller
- 1 wall-mount remote control, also keyed to the controller
- 24 volt 60 watt universal (100 to 240 Volt AC, 50 or 60 Hz) adapter
- a RGB live end connector
- Waterproof Super Flat Rope 4-Wire Red-Green-Blue LED strip lighting (12 inches)
- Waterproofing materials, including:
 - sealant tube
 - 1 tie down
 - 1 end cap
 - 2 heat shrink tubes RGB LED strip connectors.

RGB LED Strip Light with Controller Deluxe Sample Kit

This is a sample kit of our very popular Red-Green-Blue color-changing LED strip lighting. Just plug it in and it works. You can use it for selling, gaining approvals, and so forth. This kit demonstrates our [PMRC controller](#) operation, including programmability, brightness, color, appearance of both regular and waterproof strips, plus double density (high brightness) strips. You also get the waterproofing materials to become familiar with how they work.

Regular Density RGB
(150 nodes/5 m reel)

Double Density RGB
(300 nodes/5 m reel)

We include a project-size power supply with this sample kit so you can easily convert it to your project after buying additional strips. You get the sample kit for just a bit more than the controller and power supply.

Wireless Wall-Mount Remote Control

The kit includes both a wall-mount wireless and a hand held remote control, which are electrically identical. The wall-mount remote control fits in a standard gang box and uses a screw-less Decora-style decorative plate. Pop off the plate to reveal the battery compartment to enable you to replace the 27A 12 volt battery. The wall-mount is wireless and communicates with the controller using radio waves.

The kit is pre-wired and includes:

- PMRC controller
- 1 hand-held remote control, keyed to the controller
- 1 wall-mount remote control, also keyed to the controller
- 12 volt 60 watt universal (100 to 240 Volt AC, 50 or 60 Hz) adapter
- RGB LED strip connectors
- Waterproof Sheath LED 4-Wire Red-Green-Blue Strip Lighting (12 inches)
- LED 4-Wire Red-Green-Blue Double Density Strip Lighting (12 inches)
- Waterproofing materials, including:
 - sealant tube
 - 1 tie down
 - 2 caps, 1 with holes and 1 without.

RGB LED Strip Light with Sound-to-Light Controller Deluxe Sample Kit

This is a sample kit of our very popular Red-Green-Blue color-changing LED strip lighting. Just plug it in and it works. You can use it for selling, gaining approvals, and so forth. This kit demonstrates our Sound-to-Light [STL controller](#) operation, including making your LED strips flash to music, various steady-burn color selection functions and color fade programs. You can also check brightness, color, appearance of both regular and waterproof strips, plus double density (high brightness) strips. You also get the waterproofing materials to become familiar with how they work.

Regular Density RGB
(150 nodes/5 m reel)

Double Density RGB
(300 nodes/5 m reel)

We include a project-size power supply with this sample kit so you can easily convert it to your project after buying additional strips. You get the sample kit for just a bit more than the controller and power supply.

[kitrgbstl](#)

The kit includes a hand held remote control.

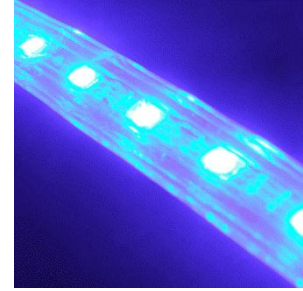

The kit is pre-wired and includes:

- STL controller
- 1 hand-held remote control
- 12 volt 60 watt universal (100 to 240 Volt AC, 50 or 60 Hz) adapter
- RGB LED strip connectors
- Waterproof Sheath LED 4-Wire Red-Green-Blue Strip Lighting (12 inches)
- LED 4-Wire Red-Green-Blue Double Density Strip Lighting (12 inches)
- Waterproofing materials, including:
 - sealant tube
 - 1 tie down
 - 2 caps, 1 with holes and 1 without.

RGB LED Super Flat Rope Light with 3-Channel Dimmer Deluxe Sample Kit

This is a sample kit of our very popular Red-Green-Blue color-changing LED Super Flat Rope. Just plug it in and it works. You can use it for selling, gaining approvals, and so forth.

This kit demonstrates the brightness, color and appearance of RGB Super Flat Rope with the functionality of our RGB LED Dimmer (3 channel). You also get the waterproofing materials to become familiar with how they work.

[kitrgb3sf](#)

[RGB LED Dimmer \(3 channel\) - 12 or 24 VDC](#)

The kit is pre-wired and includes:

- RGB LED Dimmer (3 channel).
- 24 volt 24 watt universal (100 to 240 Volt AC, 50 or 60 Hz) adapter with North American Plug.
- RGB live end connector.
- Waterproof Super Flat Rope 4-Wire Red-Green-Blue LED strip lighting (12 inches).
- Waterproofing materials, including:
 - sealant tube
 - 1 tie down with screws
 - 1 end cap
 - 2 heat shrink tubes.

RGB LED Strip Light with 3-Channel Dimmer Deluxe Sample Kit

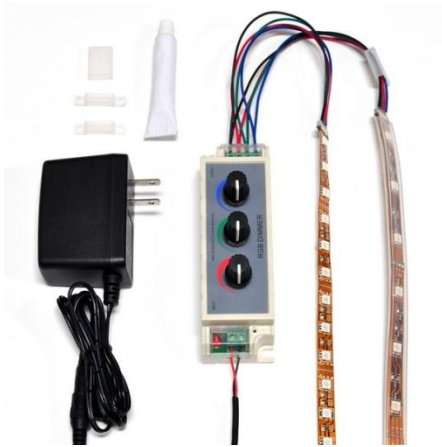

This is a sample kit of our very popular Red-Green-Blue color-changing LED strip lighting. Just plug it in and it works. You can use it for selling, gaining approvals, and so forth.

This kit demonstrates the brightness, color and appearance of both regular and waterproof ribbon, plus double density (high brightness) ribbon with the functionality of our RGB LED Dimmer (3 channel). You also get the waterproofing materials to become familiar with how they work.

Regular Density RGB
(150 nodes/5 m reel)

Double Density RGB
(300 nodes/5 m reel)

[kitrgb3](#)

[RGB LED Dimmer \(3 channel\) - 12 or 24 VDC](#)

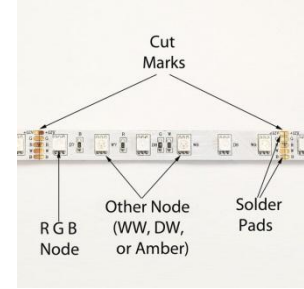

The kit is pre-wired and includes:

- RGB LED Dimmer (3 channel).
- 12 volt 24 watt universal (100 to 240 Volt AC, 50 or 60 Hz) adapter with a North American plug.
- RGB ribbon connectors.
- Waterproof Sheath 4-Wire Red-Green-Blue LED strip lighting (12 inches).
- 4-Wire Red-Green-Blue Double Density LED strip lighting (12 inches).
- Waterproofing materials, including:
 - sealant tube
 - 2 tie downs
 - 2 caps, 1 with holes and 1 without.

RGB ColorPlus LED Strip Light with 4-Channel Dimmer Deluxe Sample Kit

This is a sample kit of our deluxe Red-Green-Blue ColorPlus (Warm White, Daylight White, and Amber) color-changing LED strip lighting. Just plug it in and it works on all three strips. You can use it for selecting colors, comparing the different effects of each strip, selling, and so forth.

This kit demonstrates the brightness, color and appearance of both regular and waterproof ribbon with the functionality of our RGB ColorPlus 4-Channel LED Controller (rain-proof). You also get the waterproofing materials to become familiar with how they work.

RGB ColorPlus Deluxe Strip Light
Sample Kit with Controller
kitColorPlus

RGB ColorPlus 4-Channel LED Controller
(rain-proof) - 12 or 24 VDC
[RGBX1](#)

The kit is pre-wired and includes:

- RGB Color Plus Controller (4 channel).
- 60 Watt 12 VDC universal (100 to 240 Volt AC, 50 or 60 Hz) adapter with a North American plug.
- RGB ColorPlus ribbon connectors.
- One sample of each RGB Color Plus LED strip (3 total)
 - LED Strip Light 5-Wire Red-Green-Blue-Warm White (12 inches).
 - LED Strip Light 5-Wire Red-Green-Blue-Daylight White (12 inches).
 - Waterproof LED Strip Light 5-Wire Red-Green-Blue-Amber (12 inches).
- Male mini plug
- 6 wire nuts
- Waterproofing materials, including:
 - sealant tube
 - 2 tie downs
 - 2 caps, 1 with holes and 1 without.
