The colors of Lutron

Gloss colors:
- white (WH)
- ivory (IV)
- almond (AL)
- light almond (LA)
- gray (GR)
- brown (BR)
- black (BL)

Satin Colors®:
- hot (HT)
- merlot (MR)
- plum (PL)
- turquoise (TQ)
- sea glass (SG)
- taupe (TP)
- eggshell (ES)
- biscuit (Bl)
- snow (SW)
- palladium (PD)
- midnight (MN)
- sienna (SI)
- terracotta (TC)
- greenbriar (GBl)
- bluestone (Bl)
- mocha stone (MS)
- goldstone (GS)
- desert stone (DS)
- stone (ST)
- limestone (LS)

See page 02–03 for color options for each component

Maestro Wireless Solutions
Simple light control solutions for your home or office
Maestro Wireless is a family of wireless dimmers and switches that install easily and communicate with Lutron wireless controllers and sensor products via Lutron’s reliable Clear Connect™, Radio Frequency (RF) technology. Maestro Wireless is a time-saving and cost-effective retrofit light control solution for both residential and commercial spaces.

**Saves energy**
- Use manual or preset dimming control to reduce the energy used by the lights (dimmers only)
- Integrate simply with Radio Powr Savr™ wireless sensors to control light levels based on room occupancy and available daylight (see pages 02–03 for information about sensors)

**Enhances convenience, ambience and décor**
- Use Pico™ wireless control to dim or switch lights from anywhere in the space
- Precise light level control with a dimmer allows you to provide the right light for any room or activity
- Sleek, elegant design complements any décor (see back cover for color options)

**Superior performance and easy installation**
- Patented Clear Connect RF technology ensures reliable communication between devices
- Components retrofit simply into an existing wallbox, or plug into outlets without the need to pull new wire
- Hassle-free set up of dimmers, switches, sensors, Pico wireless controllers, and plug-in modules

**What is Maestro Wireless®?**

Maestro Wireless is a family of wireless dimmers and switches that install easily and communicate with Lutron wireless controllers and sensor products via Lutron’s reliable Clear Connect™, Radio Frequency (RF) technology. Maestro Wireless is a time-saving and cost-effective retrofit light control solution for both residential and commercial spaces.

**Saves energy**
- Use manual or preset dimming control to reduce the energy used by the lights (dimmers only)
- Integrate simply with Radio Powr Savr™ wireless sensors to control light levels based on room occupancy and available daylight (see pages 02–03 for information about sensors)

**Enhances convenience, ambience and décor**
- Use Pico™ wireless control to dim or switch lights from anywhere in the space
- Precise light level control with a dimmer allows you to provide the right light for any room or activity
- Sleek, elegant design complements any décor (see back cover for color options)

**Superior performance and easy installation**
- Patented Clear Connect RF technology ensures reliable communication between devices
- Components retrofit simply into an existing wallbox, or plug into outlets without the need to pull new wire
- Hassle-free set up of dimmers, switches, sensors, Pico wireless controllers, and plug-in modules

**The technology**

Because lighting is a critical building system, the performance of the light control system must be flawless. Lutron-exclusive RF technologies make Maestro Wireless and the easy-to-integrate Radio Powr Savr™ wireless sensors and Pico™ wireless controllers the best choice for reliability and performance.

**Clear Connect, RF technology**

Clear Connect is a proprietary wireless protocol, so interference from other devices is nearly impossible. And because each control is uniquely addressed, the risk of interference from other sensors is eliminated. With Clear Connect, the sensors communicate flawlessly, every time.

---

**Maestro Wireless easily communicates with the following Lutron wireless components:**

- **Radio Power Savr Occupancy sensor:**
  - Diameter: 4.00” (102mm)
  - Depth: 1.30” (33mm)

- **Radio Power Savr Daylight sensor:**
  - Diameter: 1.60” (41mm)
  - Depth: 0.70” (17mm)

- **Pico wireless controller:**
  - Width: 1.28” (33mm)
  - Height: 2.60” (66mm)

---

**Dimensions:**

- Dimmer and Switch:
  - Width: 2.94” (75mm)
  - Height: 4.69” (119mm)

- Lamp Dimmer:
  - Width: 2.45” (62mm)
  - Height: 3.23” (82mm)

- Cord: 6’ (1.83m)

- Radio Powr Savr Occupancy sensor:
  - Diameter: 4.00” (102mm)
  - Depth: 1.30” (33mm)

- Radio Powr Savr Daylight sensor:
  - Diameter: 1.60” (41mm)
  - Depth: 0.70” (17mm)

- Pico wireless controller:
  - Width: 1.28” (33mm)
  - Height: 2.60” (66mm)

- Plug-in module:
  - Width: 2.25” (57mm)
  - Height: 3.25” (83mm)
  - Socket Cord: 5’ (127mm)
  - Plug Cord: 2’ (0.6m)

Create your own system

1. Dimmers and switches

Maestro Wireless® is a scalable light control solution

1. Start with a Maestro Wireless dimmer or switch for elegant, intuitive control of a light or group of lights.

2. Combine it with the energy-saving Radio Powr Savr™ wireless occupancy/vacancy sensor to turn lights on when a room is occupied and off when it is vacant. Add a daylight sensor to reduce or increase electric light in response to available daylight.1

3. Add a convenient Pico™ wireless controller to provide control of the lighting from anywhere in the space. A Pico can control up to 10 Maestro Wireless dimmers or switches.

Maestro Wireless dimmer (pictured) and switch
- Models available for:
  - Incandescent, halogen
  - Magnetic low voltage
  - 3-Wire fluorescent (available Q2 2010)
  - Electronic low voltage (available Q2 2010)

Plug-in module
- Dims and switches lighting loads

Lamp dimmer
- Integrates floor and table lamps into wireless lighting control system

Colors and finishes:
- Wall-mounted dimmers, switches and Claro® wallplates available in gloss colors and Satin Colors® (see back cover for color options)
- Plug-in module available in white (WH) or black (BL)
- Lamp dimmers available in white (WH) or black (BL)

2. Radio Powr Savr™ sensors

Ceiling-mount occupancy/vacancy sensor
- Turns lights on when room is occupied and off when room is vacant

Wall-mount occupancy/vacancy sensor
- Turns lights on when room is occupied and off when room is vacant

Ceiling-mount daylight sensor
- Adjusts lights based on the amount of available daylight

Colors and finishes:
- Ceiling-mount occupancy/vacancy sensors available in white (WH), black (BL) or light almond (LA)
- Wall-mount and corner-mount occupancy/vacancy sensors available in white (WH)
- Daylight sensors available in white (WH)

3. Pico™ wireless controls

Pico wireless control
- One Pico control can communicate wirelessly with up to 10 Maestro Wireless dimmers, lamp dimmers, and switches
- Available as free standing, wall mounted, car-visor clip, or on table stand for convenient wireless dimming or switching control
- Pico controls for Sivoia® QS Wireless shades are also available

Colors and finishes:
- Pico wireless controls available in gloss colors and white and gray (WG)
- Table stands for Pico wireless control available in white (WH) or black (BL)

See pages 04–05 for model numbers, control types, and maximum capacities for each device.

1 Sensors communicate with up to 10 dimmers or switches. Add up to three occupancy/vacancy sensors per dimmer or switch for maximum coverage.
