The Ilumipanel™ 24g2 IP User Manual Rev. 3 covers the description, safety precautions, installation, programming, operation, and maintenance of the Ilumipanel™ 24g2 IP. ILUMINARC® released this edition of the Ilumipanel™ 24g2 IP User Manual Rev. 3 in October 2015. Read the guide that shipped with the Ilumipanel™ 24g2 IP and this User Manual before installing, operating, or maintaining this product.

Trademarks
The ILUMINARC® logo, the ILUMINARC® name and all other trademarks in this document related to services or products by ILUMINARC® are trademarks owned or licensed by ILUMINARC®, its affiliates or subsidiaries. Any other product names, logos, brands, company names, trademarks featured or referred to within this document are the property of their respective trademark holders.

Manual Usage
ILUMINARC® authorizes its customers to download and print this manual for professional information purposes only. ILUMINARC® expressly prohibits the usage, copy, storage, distribution, modification, or printing of this manual or its content for any other purpose without its written consent.

Document Printing
For better results, print this document in color, on letter size paper (8.5 x 11 in), double-sided. If using A4 paper (210 x 297 mm), configure your printer to scale the content of this document to A4 paper.

Disclaimer
ILUMINARC® believes that the information contained in this manual is accurate in all respects. However, ILUMINARC® assumes no responsibility for any error or omissions in this document. ILUMINARC® reserves the right to revise this document and to make changes from time to time in the content without obligation of ILUMINARC® to notify any person or company of such revision or changes. ILUMINARC® may issue a revision of this manual or a new edition of it to incorporate such changes. This does not constitute in any way a commitment by ILUMINARC® to make such changes.

Document Revision
The Ilumipanel™ 24g2 IP User Manual Rev. 3 supersedes all previous versions of this manual. Discard any older versions of this manual and replace with this version. Go to http://www.Iluminarc.com/ for the latest version.

1. Introduction

What Is In The Box

- Ilumipanel™ 24g2 IP
- Power Input Cord
- Data Input/Output Cord
- Warranty Card
- Quick Reference Guide

Unpacking Instructions

Immediately upon receiving a product from ILUMINARC®, carefully unpack the carton. Check the contents of the box to ensure that all parts are present and that they are in good condition.

Claims

The carrier is responsible for any damage incurred during shipping. Therefore, if the received merchandise appears to have been damaged during shipping, the customer must submit the damage report and any related claims to the carrier, not ILUMINARC®. The customer must submit the report upon receipt of the damaged merchandise. Failure to do so in a timely manner may invalidate the customer’s claim with the carrier.

For other issues such as missing components or parts, damage not related to shipping, or concealed damage, the customer must make claims to ILUMINARC® within 7 days of receiving the merchandise.

Safety Notes

Please read all the following Safety Notes carefully because they include important information on how to install, use, and maintain this product safely.

Personal Safety

- Avoid direct eye exposure to the light source while the product is on.
- Always disconnect this product from its power source before servicing.
- Always connect this product to a grounded circuit to avoid the risk of electrocution.
- Do not touch this product’s housing when operating because it may be very hot.

Mounting and Installation

- This product is for outdoor use and can be submerged (IP67) at a depth of 1 m or less and for 30 minutes or less. Do not submerge deeper than 1 m for more than 30 minutes.
- CAUTION: When transferring product from extreme temperature environments, (e.g. cold truck to warm humid ballroom) condensation may form on the internal electronics of the product. To avoid causing a failure, allow product to fully acclimate to the surrounding environment before connecting it to power.
- Make sure there are no flammable materials close to this product while it is operating.
- When hanging this product, always secure it to a fastening device using a safety cable.

Power and Wiring

- Always make sure that you are connecting this product to the proper voltage, as per the specifications in this manual or on the product’s sticker.
- Never connect this product to a dimmer pack.
- Make sure that the power input cable is not cracked, crimped, or damaged.
- Never disconnect this product by pulling on the power input cable.

Operation

- The maximum ambient temperature is 113 °F (45 °C). Do not operate this product at a higher temperature.
- In case of a serious operating problem, stop using this product immediately!
2. Product Description

The Ilumipanel™ 24g2 IP is a flat panel wash product that may be used to light a variety of both indoor and outdoor applications. The product consists of the main housing and a steel yoke. The DMX input and output is located on the rear of the product near the bottom.

Features

- 1, 3, 4 or 7-channel RGB LED wash product
- Operating modes:
  - 1-channel: Dimmer control
  - 3-channel: RGB control
  - 4-channel: RGB, dimmer
  - 7-channel: RGB, dimmer, color macro, strobe, dimmer speed
- Five distinct dimming curves
- Built in color temperature presets
- RGB color mixing with or without a DMX controller
- High-power, 3 W LEDs (8 red, 8 green, and 8 blue)
- Pre-programmed color macros
- Cast aluminum, IP67 housing
- Impact-resistant lens cover
- IP67 stainless steel gland nuts for cable entry
- Adjustable bracket
- Humidity-controlling GORE® valve

Options

- Ilumicode controller (for product configuration)

⚠️

- The RDM2go, which includes a built in ilumicode addresser along with many other useful features is now available.
- The Ilumicoode addresser is required for product configuration (sold separately).

3. Installation

Mounting

Before mounting this product, read and follow the safety recommendations indicated in the Safety Notes.

Orientation

Always mount this product in a safe position, making sure there is adequate room for ventilation, configuration, and maintenance.

Installation

The Ilumipanel™ 24g2 IP has 3 mounting points on the mounting bracket to secure it to almost any surface provided that it can support the product’s weight. ILUMINARC® recommends following the general guidelines below when mounting the Ilumipanel™ 24g2 IP.

- When selecting an installation location, consider ease of access to the product for operation, programming adjustments and routine maintenance.
- Make sure the product’s mounting location can support its weight. See the Technical Specifications for the weight requirement(s) of this product.
Always connect the Ilumipanel™ 24g2 IP to a protected circuit with an appropriate electrical ground to avoid the risk of electrocution or fire.

Never connect the Ilumipanel™ 24g2 IP to a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel serves only as a 0–100% switch.

Make sure to connect the Ilumipanel™ 24g2 IP to a power line with the proper voltage and frequency, as per the specifications in this manual or on the product's sticker.

Make sure to disconnect the product's power cord before replacing a blown fuse, and always replace it with a fuse of the same type and rating.

AC Power
The Ilumipanel™ 24g2 IP has an auto-ranging power supply that works with an input voltage range of 100–277 VAC, 50/60 Hz.

Make sure that you are connecting this product to the proper voltage, as per the specifications in this User Manual or on the product’s sticker.

Power Consumption
To determine the power requirements for the Ilumipanel™ 24g2 IP, refer to the label affixed to the side of the product. Alternatively, you may refer to the Technical Specifications. The listed current rating indicates the maximum current draw during normal operation.

AC Plug
The Ilumipanel™ 24g2 IP comes with a bare-ended power input cord for hardwire installation. Use the table and the illustration below to wire a plug.

<table>
<thead>

</tbody>
</table>

Power Wiring
You can connect the bare-ended, IP67-rated AC power cable from the product to an IP67-rated power connector or IP67-rated junction box. If using junction boxes, make sure to use IP67-rated conduit for surface installations.
DMX Linking

You may link the Ilumipanel™ 24g2 IP to a DMX controller using a standard DMX serial connection. If using other DMX products compatible with the Ilumipanel™ 24g2 IP, you can control each individually with a single DMX controller.

If you are not familiar with the DMX standard, or if you need information about the DMX cables needed to link the Ilumipanel™ 24g2 IP to a DMX controller, you may download the DMX Primer from the ILUMINARC® website at http://www.iluminarc.com/reports/dmx-primer.

DMX Modes

The Ilumipanel™ 24g2 IP uses the standard DMX data connection for its ARC1, ARC1+D, ARC FULL, and SOLID modes. Refer to the Introduction chapter for a brief description of this (these) mode(s). Refer to the Operation chapter to learn how to configure the Ilumipanel™ 24g2 IP to work in these modes. The DMX Values section provides detailed information regarding the DMX modes.

</tbody>
</table>

Signal Wiring

To provide signal for the Ilumipanel™ 24g2 IP, you can connect the bare-ended, IP67-rated signal cable from the product to two IP67-rated signal connectors (DMX In/DMX Out) or use an IP67-rated junction box. In this case, make sure to use IP67-rated conduit.

Protocol Connectivity

The Ilumipanel™ 24g2 IP uses the USITT DMX 512 protocol. The procedure below illustrates the recommended connection method.
Controllers

The Ilumipanel™ 24g2 IP can operate with a standard DMX controller, the ILUMICON controller, or the ILUMICODE addresser. The sections below provide information on how to connect these products to the corresponding controllers. The instructions to operate these products with each of the above controllers are in the Operation section of this manual.

DMX Controller

The Ilumipanel™ 24g2 IP can work with a standard DMX controller. The channel assignments will depend on the chosen personality (see the corresponding Menu Map section) and the DMX address assigned to each product (see the Programming section).

The figure below illustrates how to connect the DMX controller to the Ilumipanel™ 24g2 IP.
To assign individual DMX addresses to each product, you must connect the Ilumicode addresser to each product, individually.

ILUMINARC® suggests that you connect no more than 20 products in this mode and keep the total distance to less than 60 m (197 ft). Otherwise, you might need to use an optically isolated signal amplifier.

The RDM2go, which includes a built in Ilumicode addresser along with many other useful features is now available.

Ilumicode addresser

The Ilumipanel™ 24g2 IP uses the Ilumicode addresser (Ilumicode) for configuration purposes. The diagram below shows how to connect the Ilumicode to this product. This connection will control multiple products at the same time, all having the same DMX address.

Important: The Ilumicode must be used to configure this product. The Ilumicode can be purchased separately through your ILUMINARC® sales representative.

4. Operation

ILUMICODE ADDRESSER

The Ilumipanel™ 24g2 IP needs an external controller, the Ilumicode addresser (“Ilumicode”), to change its configuration.

<td>&lt;UP&gt;</td>
<td>Navigates upwards through the menu list and increases the numeric value when in a function.</td>
</tr>
<tr>
<td>&lt;DOWN&gt;</td>
<td>Navigates downwards through the menu list and decreases the numeric value when in a function.</td>
</tr>
<tr>
<td>&lt;POWER&gt;</td>
<td>Turns the unit on. The unit will turn off automatically after 30 seconds of inactivity.</td>
</tr>
</tbody>
</table>

Control Options

You can set the Ilumipanel™ 24g2 IP start address in the 001–512 DMX range. This allows for the control of up to 73 products in the 7-channel ARC FULL personality.

Programming

Carry out all the programming procedures indicated below from the control panel. Refer to the Menu Map section to learn how the menu options relate to each other.

Use <ENTER> and <MENU> to change levels in the Menu Map, moving right and left respectively. Use <UP> and <DOWN> to move vertically within the Menu Map.

DMX Personality

1. Go to PERS and select any DMX personality.
2. Make sure to rearrange the DMX addresses of all products in the current DMX universe to avoid address overlapping.

DMX Starting Address

1. Go to DMX.
2. Select a starting DMX address (001–512).
Static Colors
1. Go to STATIC.
2. Select a color or effect (Red, Green, Blue, or Strobe).
3. Select a color value (000–255) or a strobe frequency (0–20).

Dimmer
This setting gives the user four different options to simulate the dimming curve of an incandescent lighting product.
1. Go to DIMMER.
2. Select a dimming curve (OFF or DIM1–4).

Procedure:

<table>
<thead>
<tr>
<th>DIMMER</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>OFF</td>
<td>Dimmer curve is linear with fader</td>
</tr>
<tr>
<td>DIM1</td>
<td>Non-linear (fast)</td>
</tr>
<tr>
<td>DIM2</td>
<td>Non-linear (fast)</td>
</tr>
<tr>
<td>DIM3</td>
<td>Non-linear (slow)</td>
</tr>
<tr>
<td>DIM4</td>
<td>Non-linear (slowest)</td>
</tr>
</tbody>
</table>

Color
1. Go to SETTINGS > COLOR.
2. Select the color method (OFF, RGBTOW, or UC).

Details:
OFF  
When the RGB faders are all set to 255, the output is maximum.
RGB TO W  
When the RGB faders are all set to 255, the output is the selected White color (see Whites Setting).
UC  
When the RGB faders are all set to 255, the output matches the same color output of previous versions of this product.

Whites Setting
1. Go to CALIB.
2. Select a white color (WHITE 1–11 or RGBTOW).
3. Select an RGB color (Red, Green, or Blue).
4. Configure the color value (0–255).
5. Repeat steps 3 and 4 for the other RGB colors to obtain a white color.
6. Repeat steps 2 through 5 for the other white colors.

Reset to Factory Settings
1. Go to SETTINGS > RESET.
2. Select an option (YES/NO).

5. Technical Information

Product Maintenance

To maintain optimum performance and minimize wear, clean the products frequently. Usage and environment are contributing factors in determining the cleaning frequency. As a general guideline, products should be cleaned at least twice a month. Dust build-up reduces light output, performance, and can cause overheating. This can lead to reduced light source life and increased mechanical wear.

For products containing external optical lenses, clean them periodically to optimize light output. The cleaning frequency depends on the environment in which the product operates. Damp, smoky, or particularly dirty surrounding can cause greater accumulation of dirt on the product’s optics, requiring more frequent cleaning.

To clean a product:

1. Unplug the product from power.
2. Wait until the product is at room temperature.
3. Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external vents and reachable internal components.
4. Clean all external glass optics and glass surfaces with a mild solution of glass cleaner or isopropyl alcohol, and a soft, lint-free cotton cloth or lens-cleaning tissue.
5. Apply the solution directly to the cloth or tissue and wipe any dirt and grime to the outside edge of the lens.
6. Gently polish the external glass surfaces until they are free of haze and lint.

Product Repairs

ILUMINARC® strongly advises you against attempting any repairs to this product unless you are an authorized ILUMINARC® technician.
Photometrics

Filename: RGB 30 2014.7.24_IESNA2002
Manufacturer: ILUMIPANEL 24 IP
Luminaire: LED R+G+B)*8
Lamp: ILUMIPANEL 24 IP
Lamp Cat: ILUMIPANEL 24 IP OPTIC 30 RGB
Lamp Output: 1 lamp, rated Lumens/lamp: 1500
Max Candela: 7,663.2 at Horizontal: 180°, Vertical: 1°
Input Wattage: 67.8
Luminous Opening: Rectangle (L: 0.3M, W: 0.15M)
Test Date: 2014-7-24
Test Lab: ILUMIPANEL 24 IP
Photometry: Type 8
Cutoff Class: n/a
Nema Type: 3 X 3

LED Disclaimer

LED Life

ILUMINARC® rates LED lifetime based on lumen depreciation of 70% of the original output, with data provided by the manufacturer of the LED. Data from the manufacturer of the LED are not independently verified or measured by ILUMINARC®. When the product is operating in optimal environmental conditions, the LED lifetime is rated to be 50,000 to 70,000 hours by the LED manufacturer.

LED Binning

LED manufacturers sort LEDs into “bins,” based on variances in color, output intensity, and the frequency at which the semiconductor operates. ILUMINARC® strives to hold its LED manufacturers to the highest standards of binning to optimize consistency in output from product to product. However, the availability of a single bin cannot be guaranteed. With that in mind, ILUMINARC® has developed a rigorous control system to seek the best-achievable consistency in color and output.

Color Rendering Index (CRI)

CRI is an industry standard method to compare properties of different types of light sources. There are known limitations and inconsistencies related to CRI. Results may vary depending on the environmental factors involved. For this reason, the U.S. Department of Energy (DOE) states that CRI should be considered as one point of reference among others in evaluating white LED products and systems.

The following is an excerpt of recommendations from the DOE:

1. Identify the visual tasks to be performed under the light source. If color fidelity under different light sources is critically important (for example, in a space where color or fabric comparisons are made under both daylight and electric lighting), CRI values may be a useful metric for rating LED products.

2. CRI may be compared only for light sources of equal correlated color temperature. This applies to all light sources, not only to LEDs. Also, differences in CRI values of less than five points are not significant, e.g., light sources with 80 and 84 CRI are essentially the same.

3. If color appearance is more important than color fidelity, do not exclude white light LEDs solely on the basis of relatively low CRI values. Some LED products with CRIs as low as 25 still produce visually pleasing white light.

4. Evaluate LED systems in person and, if possible, on-site when color fidelity or color appearance are important issues.

Return Procedure

You must send the merchandise prepaid, in the original box, and with its original packing and accessories. ILUMINARC® will not issue call tags. Call ILUMINARC® and request a Return Merchandise Authorization Number (RMA #) before shipping the product. Be prepared to provide the model number, serial number, and a brief description of the cause for the return.

The user must clearly label the package with an RMA #. ILUMINARC® will refuse any product returned without an RMA #. DO NOT write the RMA # directly on the box. Instead, write it on a properly affixed label.

Once you receive the RMA #, please include the following information on a piece of paper inside the box:

- Your name
- Your address
- Your phone number
- The RMA #
- A brief description of the problem

Be sure to pack the product properly. Any shipping damage resulting from inadequate packaging will be the customer’s responsibility. Proper FedEx packing or double-boxing are recommended.
