Edition Notes

The Ilumipod 18g2 IP Optic WW User Manual Rev. 4 covers the description, safety precautions, installation, programming, operation, and maintenance of the Ilumipod 18g2 IP Optic WW. ILUMINARC® released this edition of the Ilumipod 18g2 IP Optic WW User Manual Rev. 4 in November 2015.

Trademarks

The ILUMINARC® logo, the ILUMINARC® name and all other trademarks in this document related to services or products by ILUMINARC® are trademarks owned or licensed by ILUMINARC®, its affiliates or subsidiaries. Any other product names, logos, brands, company names, trademarks featured or referred to within this document are the property of their respective trademark holders.

Manual Usage

ILUMINARC® authorizes its customers to download and print this manual for professional information purposes only. ILUMINARC® expressly prohibits the usage, copy, storage, distribution, modification, or printing of this manual or its content for any other purpose without its written consent.

Document Printing

For better results, print this document in color, on letter size paper (8.5 x 11 in), double-sided. If using A4 paper (210 x 297 mm), configure your printer to scale the content of this document to A4 paper.

Intended Audience

Any person in charge of installing, operating, and/or maintaining the Ilumipod 18g2 IP Optic WW should read all of both the guide that shipped with it and this User Manual before installing, operating, or maintaining this product.

Disclaimer

ILUMINARC® believes that the information contained in this manual is accurate in all respects. However, ILUMINARC® assumes no responsibility for any error or omissions in this document. ILUMINARC® reserves the right to revise this document and to make changes from time to time in the content hereof without obligation of ILUMINARC® to notify any person or company of such revision or changes. This does not constitute in any way a commitment by ILUMINARC® to make such changes. ILUMINARC® may issue a revision of this manual or a new edition of it to incorporate such changes.

Document Revision

The Ilumipod 18g2 IP Optic WW User Manual Rev. 4 supersedes all previous versions of this manual. Replace any previous versions of this manual with this version.

1. Introduction

What Is In the Box

- Ilumipod 18g2 IP Optic WW
- Warranty Card
- Quick Reference Guide

Unpacking Instructions

Immediately upon receiving a product from ILUMINARC®, carefully unpack the carton. Check the contents of the box to ensure that all parts are present and that they are in good condition.

Claims

The carrier is responsible for any damage incurred during shipping. Therefore, if the received merchandise appears to have been damaged during shipping, the customer must submit the damage report and any related claims to the carrier, not ILUMINARC®. The customer must submit the report upon receipt of the damaged merchandise. Failure to do so in a timely manner may invalidate the customer’s claim with the carrier.

For other issues such as missing components or parts, damage not related to shipping, or concealed damage, the customer must make claims to ILUMINARC® within 7 days of receiving the merchandise.

Introduction

There are no user-serviceable parts inside this product. Any reference to servicing you may find in this User Manual will only apply to properly certified ILUMINARC® technicians. Do not open the housing or attempt any repairs unless you are certified to do so.

Please refer to all applicable local codes and regulations for the proper installation of this product.

Keep this manual for future consultation. If you sell this product to another user, make sure that they also receive this manual.

In the unlikely event that your Ilumipod 18g2 IP Optic WW may require service, please contact ILUMINARC® Technical Support.

Safety Notes

Please read all the following Safety Notes carefully because they include important information on how to install, use, and maintain this product safely.

Personal Safety

- Avoid direct eye exposure to the light source while the product is on.
- Always disconnect this product from its power source before servicing.
- Always connect this product to a grounded circuit to avoid the risk of electrocution.
- Do not touch this product’s housing when operating because it may be very hot.

Mounting and Installation

- This product is for outdoor use and can be submerged (IP67). However, do not submerge deeper than 1 m for more than 30 minutes.
- CAUTION: When transferring product from extreme temperature environments, (e.g. cold truck to warm humid ballroom) condensation may form on the internal electronics of the product. To avoid causing a failure, allow product to fully acclimate to the surrounding environment before connecting it to power.
- This product weighs 11.6 lbs (5.26 kg). Always ask for help when mounting this product to avoid personal injuries or damage to the product.
- Make sure there are no flammable materials close to this product while it is operating.
- When hanging this product, always secure it to a fastening device using a safety cable.

Power and Wiring

- Always make sure that you are connecting this product to the proper voltage, as per the specifications in this manual or on the product’s sticker.
- Never connect this product to a dimmer pack.
- Make sure that the power input cable is not cracked, crimped, or damaged.
- Never disconnect this product by pulling or tugging on the power input cable.

Operation

- The maximum ambient temperature is 113° F (45° C). Do not operate this product at a higher temperature.
- In case of a serious operating problem, stop using this product immediately!
2. Product Description

The Ilumipod 18g2 IP Optic WW is an LED wash light intended to light a variety of both indoor and outdoor applications installation space is limited. The Ilumipod 18g2 IP Optic WW consists of cast aluminum body containing a power supply, control unit, and an adjustable base. The DMX input and output is located on rear of the product.

**Features**

- Operating mode, 1-channel: Dimmer
- 5 distinct dimming curves
- High-power, 3-W warm white LEDs
- Cast aluminum, IP67 housing
- Impact-resistant glass lens cover
- IP67 stainless steel gland nuts for cable entry
- Adjustable bracket
- Humidity-controlling GORE® valve

**Options**

- Ilumicode Addresser (for product configuration)

⚠️

- The RDM2go, which includes a built in ilumicode addresser along with many other useful features is now available.
- The Ilumicoode addresser is required for product configuration (sold separately).

3. Installation

Mounting
Before mounting this product, read and follow the safety recommendations indicated in the Safety Notes.

Orientation
Always mount this product in a safe position, making sure there is adequate room for ventilation, configuration, and maintenance.

Installation
The Ilumipod 18g2 IP Optic WW comes with two adjustable brackets with 3-mm slot openings to mount the product on any firm, non-flammable surface. The angle of the product can also be adjusted and locked into place after the fixture has been mounted. ILUMINARC® recommends following the general guidelines below when mounting the Ilumipod 18g2 IP Optic WW.

- When selecting an installation location, consider ease of access to the product for operation, programming adjustments, and routine maintenance.
- Make sure the product’s mounting location can support its weight. See the Technical Specifications for the weight requirement(s) of this product.

Procedure
The Ilumipod 18g2 IP Optic WW comes with a mounting base which connects to the arm of the product. The mounting plate has four 6.1-mm holes on the corners to mount the product in any orientation to almost any firm, non-flammable surface capable of supporting its weight. You will have to use 4 mounting points per product.
Always connect the Ilumipod 18g2 IP Optic WW to a protected circuit with an appropriate electrical ground to avoid the risk of electrocution or fire.

Never connect the Ilumipod 18g2 IP Optic WW to a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel serves only as a 0 to 100% switch.

Make sure to connect the Ilumipod 18g2 IP Optic WW to a power line with the proper voltage and frequency, as per the specifications in this manual or on the product’s sticker.

AC Power
The Ilumipod 18g2 IP Optic WW has an auto-ranging power supply that works with an input voltage range of 100–240 VAC, 50/60 Hz.
Make sure that you are connecting this product to the proper voltage, as per the specifications in this User Manual or on the product’s sticker.

Power Consumption
To determine the power requirements for the Ilumipod 18g2 IP Optic WW, refer to the label affixed to the side of the product. Alternatively, you may refer to the Technical Specifications. The listed current rating indicates the maximum current draw during normal operation.

AC Plug
The Ilumipod 18g2 IP Optic WW comes with a bare-ended power input cord for hardwire installation. Use the table and the illustration below to wire a plug.

<table>
<thead>
<tr>
<th>Connection</th>

</tbody>
</table>

Power Wiring
You can connect the bare-ended, IP67-rated AC power cable from the product to an IP67-rated power connector or IP67-rated junction box.
If using junction boxes, make sure to use IP67-rated conduit for surface installations.
The Ilumipod 18g2 IP Optic WW must be linked using DMX cable in a daisy chain (serial) fashion. To comply with the EIA-485 standard, no more than 32 products should be connected on one daisy chain without using a DMX optically isolated splitter. Doing otherwise may result in deterioration of the digital DMX signal.

DMX Linking
You may link the Ilumipod 18g2 IP Optic WW to a DMX controller using a standard DMX serial connection. If using other DMX products compatible with the Ilumipod 18g2 IP Optic WW, you can control each individually with a single DMX controller. If you are not familiar with the DMX standard, or if you need information about the DMX cables needed to link the Ilumipod 18g2 IP Optic WW to a DMX controller, you may download the “DMX Primer” from the ILUMINARC® website at http://www.iluminarc.com/reports/dmx-primer.

DMX Modes
The Ilumipod 18g2 IP Optic WW uses the standard DMX data connection for its DMX personality, SOLID. Refer to the Introduction chapter for a brief description of this mode. Refer to the Operation chapter to learn how to configure the Ilumipod 18g2 IP Optic WW to work in this mode. The DMX Values section provides detailed information regarding the DMX modes.

<table>
<thead>
<tr>
<th>DMX Mode</th>
<th>DMX Address</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOLID</td>
<td>512</td>
</tr>
</tbody>
</table>

Signal Wiring
To provide signal for the Ilumipod 18g2 IP Optic WW, you can connect the bare-ended, IP67-rated signal cable from the product to two IP67-rated signal connectors (DMX In/DMX Out) or use an IP67-rated junction box. In this case, make sure to use IP67-rated conduit.

Protocol Connectivity
The Ilumipod 18g2 IP Optic WW uses the USITT DMX 512 protocol. The procedure below illustrates the recommended connection method.
Controllers

The Ilumipod 18g2 IP Optic WW can operate with a standard DMX controller or the ILUMICODE addresser. The sections below provide information on how to connect these products to the corresponding controllers. The instructions to operate these products with each of the above controllers are in the Operation chapter of this manual.

DMX Controller

The Ilumipod 18g2 IP Optic WW can work with a standard DMX controller. The channel assignments will depend on the chosen personality (see the corresponding Menu Map section) and the DMX address assigned to each product (see the Programming section). The figure below illustrates how to connect the DMX controller to the Ilumipod 18g2 IP Optic WW.
The RDM2go, which includes a built-in Ilumicode addresser along with many other useful features is now available.

To assign individual DMX addresses to each product, you must connect the Ilumicode addresser to each product, individually.

ILUMINARC® suggests that you connect no more than 20 products in this mode and keep the total distance to less than 60 m (197 ft). Otherwise, you might need to use an optically isolated signal amplifier.

**Ilumicode Addresser**

The Ilumopod 18g2 IP Optic WW uses the Ilumicode Addresser (“Ilumicode”) for configuration purposes. The diagram below shows how to connect the Ilumicode to this product. This connection will control multiple products at the same time, all having the same DMX address.

**Important:** The Ilumicode must be used to configure this product. The Ilumicode can be purchased separately through your ILUMINARC® sales representative.

![Ilumicode Addresser diagram](image)

**Diagram Description:**
- **Power** connected to the Ilumicode Addresser and to other fixtures.
- **Signal** connected to the Ilumicode Addresser and to other fixtures.
- **DMX Output** includes 1. Gnd, 2. Data - (Green clip), 3. Data + (Red clip).
- **Signal Connector** includes 1. Gnd (Black clip), 2. Data - (Green clip), 3. Data + (Red clip).
4. Operation

Ilumicode Addresser

The Ilumipod 18g2 IP Optic WW needs an external controller, the Ilumicode Addresser (“Ilumicode”), to change its configuration.

Ilumicode Panel Description

<table>
<thead>
<tr>
<th>Button</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>&lt;MENU&gt;</td>
<td>Exits from the current menu or function.</td>
</tr>
<tr>
<td>&lt;ENTER&gt;</td>
<td>Enables the currently displayed menu or sets the currently selected value into the selected function.</td>
</tr>
<tr>
<td>&lt;UP&gt;</td>
<td>Navigates upwards through the menu list and increases the numeric value when in a function.</td>
</tr>
<tr>
<td>&lt;DOWN&gt;</td>
<td>Navigates downwards through the menu list and decreases the numeric value when in a function.</td>
</tr>
<tr>
<td>&lt;POWER&gt;</td>
<td>Turns the unit on. The unit will turn off automatically after 30 seconds of inactivity.</td>
</tr>
</tbody>
</table>

Control Options

You can set the Ilumipod 18g2 IP Optic WW start address in the 001–512 DMX range. This allows for the control of up to 512 products in the 1-channel SOLID personality.

Programming

Carry out all the programming procedures indicated below from the control panel. Refer to the Menu Map section to learn how the menu options relate to each other. Use <ENTER> and <MENU> to change levels in the Menu Map, moving right and left respectively. Use <UP> and <DOWN> to move vertically within the Menu Map.

DMX Personality

1. Go to PERS and select SOLID.
2. Make sure to rearrange the DMX addresses of all products in the current DMX universe to avoid address overlapping.

DMX Starting Address

1. Go to DMX.
2. Select a starting DMX address (001–512).
Static Colors
1. Go to STATIC.
2. Select a color (SOLD).
3. Select a color value (000~255).

Dimmer
This setting gives the user four different options to simulate the dimming curve of an incandescent lighting product.
1. Go to DIMMER.
2. Select a dimming curve (OFF or DIM1~4).

Procedure:

<table>
<thead>
<tr>
<th>DIMMER</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>OFF</td>
<td>Dimmer curve is linear with fader</td>
</tr>
<tr>
<td>DIM1</td>
<td>Non-linear (fastest)</td>
</tr>
<tr>
<td>DIM2</td>
<td>Non-linear (fast)</td>
</tr>
<tr>
<td>DIM3</td>
<td>Non-linear (slow)</td>
</tr>
<tr>
<td>DIM4</td>
<td>Non-linear (slowest)</td>
</tr>
</tbody>
</table>

Reset to Factory Settings
1. Go to SETTINGS > RESET.
2. Select an option (YES/NO).

5. Technical Information

Product Maintenance

To maintain optimum performance and minimize wear, clean the products frequently. Usage and environment are contributing factors in determining the cleaning frequency. As a general guideline, products should be cleaned at least twice a month. Dust build-up reduces light output, performance, and can cause overheating. This can lead to reduced light source life.

For products containing external optical lenses, clean them periodically to optimize light output. The cleaning frequency depends on the environment in which the product operates. Damp, smoky, or particularly dirty surrounding can cause greater accumulation of dirt on the product’s optics, requiring more frequent cleaning.

To clean a product:

- Unplug the product from power.
- Wait until the product has cooled.
- Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external vents and reachable internal components.
- Clean all external glass optics and glass surfaces with a mild solution of glass cleaner or isopropyl alcohol, and a soft, lint-free cotton cloth or lens-cleaning tissue.
- Apply the solution directly to the cloth or tissue and wipe any dirt and grime to the outside edge of the lens.
- Gently polish the external glass surfaces until they are free of haze and lint.

Product Repairs

ILUMINARC® strongly advises you against attempting any repairs to this product unless you are an authorized ILUMINARC® technician. ILUMINARC® presents the information contained in the Troubleshooting Guide as potential solutions only. In most cases, opening the product’s housing will invalidate its warranty.

Photometrics Pro 1.3.21 copyright 2003-2012 by jSolutions, Inc.
Reported data calculated from manufacturer's data file, based on IES recommended methods.
LED Disclaimer

LED Life

ILUMINARC® rates LED lifetime based on lumen depreciation of 70% of the original output, with data provided by the manufacturer of the LED. Data from the manufacturer of the LED are not independently verified or measured by ILUMINARC®. When the product is operating in optimal environmental conditions, the LED lifetime is rated to be 50,000 to 70,000 hours by the LED manufacturer.

LED Binning

LED manufacturers sort LEDs into “bins,” based on variances in color, output intensity, and the frequency at which the semiconductor operates. ILUMINARC® strives to hold its LED manufacturers to the highest standards of binning to optimize consistency in output from product to product. However, the availability of a single bin cannot be guaranteed. With that in mind, ILUMINARC® has developed a rigorous control system to seek the best-achievable consistency in color and output.

Color Rendering Index (CRI)

CRI is an industry standard method to compare properties of different types of light sources. There are known limitations and inconsistencies related to CRI. Results may vary depending on the environmental factors involved. For this reason, the U.S. Department of Energy (DOE) states that CRI should be considered as one point of reference among others in evaluating white LED products and systems.

The following is an excerpt of recommendations from the DOE:

1. Identify the visual tasks to be performed under the light source. If color fidelity under different light sources is critically important (for example, in a space where color or fabric comparisons are made under both daylight and electric lighting), CRI values may be a useful metric for rating LED products.
2. CRI may be compared only for light sources of equal correlated color temperature. This applies to all light sources, not only to LEDs. Also, differences in CRI values of less than five points are not significant, e.g., light sources with 80 and 84 CRI are essentially the same.
3. If color appearance is more important than color fidelity, do not exclude white light LEDs solely on the basis of relatively low CRI values. Some LED products with CRIs as low as 25 still produce visually pleasing white light.
4. Evaluate LED systems in person and, if possible, on-site when color fidelity or color appearance are important issues.

Returns Procedure

You must send the merchandise prepaid, in the original box, and with its original packing and accessories. ILUMINARC® will not issue call tags. Call ILUMINARC® and request a Return Merchandise Authorization Number (RMA #) before shipping the product. Be prepared to provide the model number, serial number, and a brief description of the cause for the return. The user must clearly label the package with an RMA #. ILUMINARC® will refuse any product returned without an RMA #. DO NOT write the RMA # directly on the box. Instead, write it on a properly affixed label.

Once you receive the RMA #, please include the following information on a piece of paper inside the box:

- Your name
- Your address
- Your phone number
- The RMA #
- A brief description of the problem

Be sure to pack the product properly. Any shipping damage resulting from inadequate packaging will be the customer’s responsibility. FedEx packing or double-boxing are recommended.
