

UltraSlim LED Neon

Our Thinnest and Most Flexible LED Neon

UltraSlim LED Neon takes the hotspot-free appearance of traditional glass neon, combines it with the advantages of LED lighting and reduces the size into a narrow profile. It is remarkably narrow, at only 8.6mm wide, yet maintains a rugged durability due to its high-quality construction. This provides the eye-catching look of neon in a slim package that is easy to work with and can fit where other neon can't. With up to 5-meter run lengths powered from one end, UltraSlim LED Neon is UL Listed and saves time and money on installation. It runs on 24 volts DC and its silicone casing provides protection and a hotspot-free appearance. UltraSlim LED Neon is incredibly flexible, with a 25mm minimum lateral bending radius. It is low maintenance and easy to control with any of our LED controllers and DMX.

- Ultra-Slim 9.5mm profile
- Incredibly flexible
- UV resistant and low maintenance silicone housing
- IP65 rated with factory-sealed ends
- 5-meter run length when powered from one end

UltraSlim LED Neon
