

Mini Bluetooth Controllers

Wireless LED Lighting Control

The Mini Bluetooth Mesh Controller from Environmental Lights gives you the capability to wirelessly control your LED lights. When paired with the “Light Mesh” app, you have full control over your lighting from your smartphone. Use the pre-programmed modes or set your own dim levels and scenes. The controller features an internal clock to set preprogrammed recurring scenes based on the time of day and date of week. You can also connect multiple dimmers in up to 4 separate light zones. The integration of Bluetooth Mesh technology allows management of your network from any controller in the system making this controller a perfect addition for any smart-building lighting application.

- Wireless Control of RGB LEDs
- App compatible
- Full Circuit Protection
- Ultra-Slim and compact design
- High Power Output

Mini Bluetooth Controllers
