Edition Notes

Edition Notes
The RDM2go User Manual Rev. 1 includes a description, safety precautions, and installation, programming, operation, and maintenance instructions for the RDM2go as of the release date of this edition in November 2015.

Trademarks
CHAUVET, the Chauvet logo and RDM2go are registered trademarks or trademarks of Chauvet & Sons Inc. (d/b/a Chauvet and Chauvet Lighting) in the United States and other countries. Other company and product names and logos referred to herein may be trademarks of their respective companies.

Manual Use
Chauvet authorizes its customers to download and print this manual for professional information purposes only. Chauvet expressly prohibits the usage, copy, storage, distribution, modification, or printing of this manual or its content for any other purpose without written consent from Chauvet.

Document Printing
For better results, print this document in color, on letter size paper (8.5 x 11 in), double-sided. If using A4 paper (210 x 297 mm), configure your printer to scale the content accordingly.

Intended Audience
Any person in charge of installing, operating, and/or maintaining this product should completely read through the guide that shipped with the product, as well as this manual, before installing, operating, or maintaining this product.

Disclaimer
Chauvet believes that the information contained in this manual is accurate in all respects. However, Chauvet assumes no responsibility and specifically disclaims any and all liability to any party for any loss, damage or disruption caused by any errors or omissions in this document, whether such errors or omissions result from negligence, accident or any other cause. Chauvet reserves the right to revise the content of this document without any obligation to notify any person or company of such revision, however, Chauvet has no obligation to make, and does not commit to make, any such revisions.

Document Revision
The RDM2go User Manual Rev. 1 is the first edition of this manual. Go to www.chauvetprofessional.com for the latest version.

1. Before You Begin

What Is Included
- RDM2go
- Carry Pouch
- 2 pc, 3- to 5-pin converters
- 5-pin male to bare wire adaptor
- USB-A Male to Micro USB-B Male (3 ft)
- Warranty Card
- Quick Reference Guide

Claims
Carefully unpack the product immediately and check the box to make sure all the parts are in
the package and are in good condition.
If the box or the contents (the product and included accessories) appear damaged from
shipping or show signs of mishandling, notify the carrier immediately, not Chauvet. Failure to
report damage to the carrier immediately may invalidate your claim. In addition, keep the box
and contents for inspection.
For other issues, such as missing components or parts, damage not related to shipping, or
concealed damage, file a claim with Chauvet within 7 days of delivery.

The term “DMX” used throughout this manual refers to the USITT DMX512-A digital data transmission protocol.
Before You Begin

### Safety Notes
Read all the following Safety Notes before working with this product. These notes include important information about the installation, usage, and maintenance of this product.

**This product contains no user-serviceable parts. Any reference to servicing in this User Manual will only apply to properly trained Chauvet certified technicians. Do not open the housing or attempt any repairs.**

All applicable local codes and regulations apply to proper installation of this product.

**Personal Safety**
- Always disconnect this product from its power source before servicing.
- Always connect this product to a grounded circuit to avoid the risk of electrocution.
- The product is not intended for permanent installation.
- This product is for indoor use only! To prevent risk of fire or shock, do not expose this product to rain or moisture. (IP20)
- **CAUTION:** When transferring product from extreme temperature environments, (e.g. cold truck to warm humid ballroom) condensation may form on the internal electronics of the product. To avoid causing a failure, allow product to fully acclimate to the surrounding environment before connecting it to power.

**Mounting And Rigging**
- Make sure there are no flammable materials close to this product while it is operating.
- Always make sure you are connecting this product to the proper voltage in accordance with the specifications in this manual or on the product's specification label.
- To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.
- Never connect this product to a dimmer pack or rheostat.
- Never disconnect this product by pulling or tugging on the power cable.

**Power And Wiring**
- Do not operate this product if you see damage on the housing, lenses, or cables. Have the damaged parts replaced by an authorized technician at once.
- Do not cover the ventilation slots when operating to avoid internal overheating.
- The maximum ambient temperature is 113 °F (45 °C). Do not operate this product at a higher temperature.
- In case of a serious operating problem, stop using this product immediately!

In the unlikely event that your Chauvet product requires service, contact Chauvet Technical Support.
2. Introduction

Description

The RDM2go is a multi-functional tool for working with lighting products over a DMX/RDM data line. The palm-sized controller performs a multitude of tasks including RDM functionality, DMX snapshot, test-scene record/playback, Ilumicode addressing for Iluminarc fixtures, and DMX input/output monitoring. The RDM2go also features a built in DMX cable integrity checker, and an easy to read OLED display. The RDM2go easily recharges via a standard micro USB jack and comes with a convenient carry pouch and connector convertors.

Features

- Control Protocol: DMX, RDM, Ilumicode
- DMX Channels: 1, 2, 3, 4, 5, 6 or 7
- Modes/Personalities (Ilumicode): 13 personalities (ARC 1, ARC 1+D, ARC2, ARC2+D, ARC3, ARC3+D, ARC FULL, REMOTE, SOLID, SPECIAL1, SPECIAL2, VW, VW+D)
- Handheld tool for managing products and systems with DMX, RDM, and Ilumicode based control
- Easily address, locate and monitor RDM capable fixtures
- Check DMX addressing, cabling, and store/playback basic snapshots
- Address and set personalities of Ilumicode based architectural fixtures
- Easy to read, large OLED display and easy to navigate menus
- Comes with connector adaptors, USB charging cord and belt clip pouch

3. Setup

**DC Power**
This product operates on a rechargeable lithium ion battery.

**Charging the Battery**
To recharge the product:
1. Plug the included cable into any USB-A female outlet.
2. Plug the Micro USB-B male end into the female socket located on top of the product.

- To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power by unplugging it.
- When storing product for long periods of time without charging or using, only charge product to 50% and store in a cool dry environment.

**Battery Charge Notes**
This product is equipped with a built-in rechargeable lithium ion battery.
- Recharge the battery within three days of last use.
- Avoid depleting the battery below 10%.
- Recharge/discharge the battery to 50% capacity before storing this product for extended periods of time.
- For best results, charge the battery in a temperature between 32 ºF (0 ºC), and 95 ºF (35 ºC).
- When charging the battery, keep the product at least 1 m from any open flame or hot plate.
- Perform a full discharge/recharge cycle every three months.
- If the battery is completely discharged, the device cannot be turned on immediately when the charger is connected. Allow a depleted battery to charge for a few minutes before turning on the device.
- The device can be used while it is charging, but it may take longer to fully charge the battery.
- While charging, the device may heat up. This is normal and should not affect the device’s lifespan or performance. If the battery gets hotter than usual, the charger may stop charging.
- Lithium-Ion batteries continue to slowly discharge (self-discharge) when not in use or while in storage. Routinely check the battery’s charge status.

**Storage Notes**
- Store charged product(s) in a dry environment, away from direct sunlight.
- Charge or discharge the battery to approximately 50% of capacity at least once every six months.
- Charge or discharge the battery to approximately 50% of capacity before storage.
- Store the battery at temperatures between 41 ºF and 68 ºF (5 ºC and 20 ºC).
Connection
You can link the RDM2go to other DMX controlled products using a 5-pin DMX connection. If using other DMX-compatible products with the RDM2go, you can control each individually with a single DMX controller.

If you are not familiar with or need more information about DMX standards, Master/Slave connectivity, or the DMX cables needed to link this product to a DMX controller, download the DMX Primer from the Chauvet website: www.chauvetprofessional.com.

Remote Device Management (RDM)
Remote Device Management, or RDM, is a standard for allowing DMX-enabled devices to communicate bi-directionally along existing DMX cabling. Check the DMX controller's User Manual or with the manufacturer as not all DMX controllers have this capability. The RDM2go supports RDM protocol that allows feedback to make changes to multiple attributes of RDM-enabled products. Please refer to the RDM section in this User Manual for more detailed examples explaining how to use this function.

Ilumicode
The RDM2go will work as an Ilumicode addresser using the 5-pin DMX serial connection located at the bottom of the product and using the various adaptors included with this product and your Illuminarc product. Download the Ilumicode User Manual from www.iluminarc.com for more information about connecting and configuring the product for Ilumicode operation.
4. Operation

<table>

</tr>
</tbody>
</table>

Programming

Refer to the Menu Map to understand the menu options. The menu map shows the main level and a variable number of programming levels for each option.

- To go to the main menu level, press <MODE> repeatedly until the option shows on the display. Press <ENTER> to select. This will take you to the first programming level for that option.
- To select an option or value within the current programming level, press <UP> or <DOWN> until the option shows on the display. Press <ENTER> to select. In this case, if there is another programming level, you will see that first option, or you will see the selected value.
- Press <MODE> repeatedly to exit to the previous level.

- **Pin 1 Shorted to Pin 3**
**RDM**

The RDM2go uses Remote Device Management (RDM) software that allows feedback to make changes to connected RDM compatible products.

1. Go to the **RDM** main level.
2. The RDM2go will scan for RDM compatible products, **Discovering...** will display on the screen.
   a. **No Fixtures Found** – No RDM compatible products were found. Be sure your connected products are RDM compatible check all connections and try again.
3. Select from the list of RDM compatible products displayed.
4. Select and adjust each of the available of attributes.

**RDM Product Attributes**

Below are some examples of more common attributes that will be listed on the LCD after choosing from the list of available RDM compatible products. Each of these attributes may or may not be changeable depending on each type of individual product.

- **Label:** Allows user input such as identity information to be stored on the products memory.
- **Model:** This is the name of the product that was entered at the factory level. This attribute cannot be changed.
- **Man.:** Manufacture identity. This attribute cannot be changed.
- **Start Address:** Shows current DMX address and allows the user to change it.
- **Pers.:** Shows current product personality and allows user to change it.
- **DMX Slots:** Shows how many DMX addresses that products personality takes up. This attribute cannot be changed.
- **Slot Options:** Gives a description of what each channel in that DMX personality does. This attribute may not be available on all products.
- **Moving Light Options:** Gives options like P/T invert and P/T Swap. This attribute may not be available on all products.
- **Sensors Menu:** Shows information from the different sensors like the temperature of product
- **Display Options:** Allows user input to change the backlight level and direction of the products display and allows user to change the address.

For more information about RDM protocol and associated attributes, go to [www.openlighting.org](http://www.openlighting.org).

**Ilumicode**

This Main Level selection contains all the parameters for all the compatible ILUMINARC products it can control. Consult the corresponding product’s user manual to determine which parameters on the Ilumicode V 2.21 apply to that specific product.

**DMX Starting Address**

1. Go to **Ilumicode > Start Address**.
2. Select a starting DMX address (001–512).
3. Press <**ENTER**> to send the new DMX address to the product. The display will show “SEND...”

**DMX Personality**

1. Go to **Ilumicode > PERSON** and select any DMX personality.
2. Make sure to rearrange the DMX addresses of all products in the current DMX universe to avoid address overlapping.
DMX Values

Refer to the compatible ILUMINARC product’s manual for the DMX Values that correspond to that particular product.

- To change the DMX address of a single product, make sure that there is no other product connected to the DMX cable.
- Some personalities on this list may not apply to your ILUMINARC product. Consult the product’s manual for more information.

Static Colors

1. Go to lumicode > STATIC.
2. Select a color or effect (RED, GREN, BLUE, COOL, WARM, AMBE, SOLD, or STRB).
3. Select a color value (000–255) or a strobe frequency (00–20).

Dimmer

This setting gives the user four different options to simulate the dimming curve of an incandescent lighting product.

1. Go to lumicode > DIMMER.
2. Select a dimming curve (OFF or DIM1–4).

<table>
<thead>
<tr>
<th>DIMMER</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>OFF</td>
<td>Dimmer curve is linear with fader</td>
</tr>
<tr>

<tr>
<td>DIM4</td>
<td>Non-linear (slowest)</td>
</tr>
</tbody>
</table>

Color (Full Color Products)

1. Go to lumicode > SETTINGS > COLOR.
2. Select the color method (OFF, RGBTOW, UC).

Details:

- OFF
  - When the RGB faders are all set to “255,” the output is maximum.

- RGBTOW
  - When the RGB faders are all set to “255,” the output is the selected White color (see Whites Setting).

UC

- When the RGB faders are all set to “255,” the output matches the same color output of previous versions of this product.

Whites Setting

1. Go to lumicode > CALIB.
2. Select a white color (WHITE 1–11) or RGB TO W.
3. Select an RGB color (RED, GREN, BLUE, COOL, WARM, or AMBE).
4. Configure the color value (000–255).
5. Repeat steps 3 and 4 for the other RGB colors to obtain a white color.
6. Repeat steps 2 through 5 for the other white colors.

Reset to Factory Settings

1. Go to lumicode > SETTINGS > RESET.
2. Select an option (YES/NO).

Details:

The product will assume its default values as per the corresponding manual.
Send DMX  
This Main Level selection is a single universe of DMX. This allows control each of the 512 channels individually or all channels at the same time. Other features include:
- The ability to show levels on the screen as percentages or DMX values.
- Store and recall up to 32 different static scenes
- Create a sequence up to 100 steps using 32 scenes with adjustable fade and speed.

Channel Adjustment  
1. Go to Send DMX.
2. Select a channel (T001–T512).
3. Choose a DMX Value (000–255)
4. Repeat Steps 2 and 3 for additional channel adjustment.

In Step #3 of the Channel Adjustment section, the values may appear as percentages and/or the values of every channel may change when trying to adjust only 1 channel. Refer to the Send Options section to change these settings.

Send Options  
This programming level gives you various customization and programming options.
1. Go to Send DMX.
2. Press <ENTER> twice to get to the Send Options menu level.

Edit Mode  
1. Go to Send DMX.
2. Press <ENTER> twice.
3. Go to Edit.
4. Press <ENTER> to choose All or Normal.

Show Level As  
1. Go to Send DMX.
2. Press <ENTER> twice.
3. Go to Show Level As.
4. Press <ENTER> to choose Decimal or Percent.

Clear All Channels  
1. Go to Send DMX.
2. Press <ENTER> twice.
3. Go to Clear All Channels.
4. Press <ENTER> to clear. This will bring you back to the Send DMX level.

Dmx Sequence  
1. Go to Send DMX.
2. Press <ENTER> twice.
3. Go to Play Sequence.
4. Press <ENTER> to play/stop sequence.
5. Press <UP> or <DOWN> to adjust the speed between steps.
6. Press <LEFT> or <RIGHT> to adjust the fade time which is the time it takes for each step to fade up to 100% and fade down to 0.

Store Scene  
1. Go to Send DMX.
2. Press <ENTER> twice.
3. Go to Store Scene.
4. Press <ENTER>.
5. Press <UP> or <DOWN> to choose a scene (Scene 1–Scene 32).
6. Select a channel (T001–T512).
7. Choose a DMX Value (000–255)
8. Press <ENTER>
9. Repeat Steps 3 through 8 for additional channel adjustment.

The RDM2go stores the last scene that was changed. To start with a clean scene, refer to Clear All Channels section to set all the DMX channels to 0.
Load Scene  
1. Go to Send DMX.
2. Press <ENTER> twice.
3. Go to Load Scene.
4. Press <ENTER>.
5. Press <UP> or <DOWN> to choose a scene (Scene 1–Scene 32).

-OR-
1. Go to Load Scene.
2. Press <ENTER> twice.
3. Press <UP> or <DOWN> to choose a scene (Scene 1–Scene 32).

Receive DMX  
This Main Level selection displays incoming DMX values for each channel and allows those values to be recorded as a scene to be played back later.

View incoming DMX Values  
1. Go to Receive DMX.
2. Press <ENTER>.

Show Level As  
1. Go to Receive DMX.
2. Press <ENTER> twice.
3. Go to Show Level As.
4. Press <ENTER> to choose Decimal or Percent.

Store Scene  
1. Go to Receive DMX.
2. Press <ENTER> twice.
3. Go to Store Scene.
4. Press <ENTER> to record the current input as a scene.

Cable Test  
This Main Level selection tests data cables for continuity. Use the Cable Test Chart to determine which cables are good and which are in need of repair.

Using the Cable Tester  
1. Plug both ends of a DMX cable into the RDM2go.
2. Go to Cable Test.
3. Press <ENTER>.

Power Options  
This Main Level selection sets the amount of time the RDM2go remains turned on after the last user input. This auto-off option can be set to 1 Minute, 5 Minute, 10 Minute, or Off. Choosing Off means the product will stay on until the battery is exhausted.

Using the Power Options  
1. Go to Power Options.
2. Press <ENTER>.
3. Choose the amount of time you want the product to stay on (1 Minute, 5 Minute, 10 Minute, or Off).
4. Press <ENTER> to record the current input as a scene.

Information  
This Main Level selection provides information about current software and the product's unique identification code.
5. Technical Information

Product Maintenance

To maintain optimum performance and minimize wear, clean this product frequently. Usage and environment are contributing factors in determining the cleaning frequency.

As a rule, clean this product at least twice a month. Dust build-up reduces light output performance and can cause overheating. This can lead to reduced light source life and increased mechanical wear.

To clean your product:

1. Unplug the product from power.
2. Wait until the product is at room temperature.
3. Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external vents.
4. Clean all external surfaces with a mild solution of non-ammonia glass cleaner or isopropyl alcohol.
5. Apply the solution directly to a soft, lint-free cotton cloth or a lens cleaning tissue.
6. Wipe any dirt or grime to the outside edges of the lens surface.
7. Gently polish the lens surfaces until they are free of haze and lint.

Always dry the external surfaces thoroughly and carefully after cleaning them.

Returns

You must send the product prepaid, in the original box, and with the original packing and accessories. Chauvet will not issue call tags. Call Chauvet and request a Return Merchandise Authorization (RMA) number before shipping the product. Be prepared to provide the model number, serial number, and a brief description of the cause(s) for the return. Clearly label the package with an RMA number. Chauvet will refuse any product returned without an RMA number.

DO NOT write the RMA number directly on the box. Instead, write it on a properly affixed label.

Once you have received the RMA number, include the following information on a piece of paper inside the box:

- Your name
- Your address
- Your phone number
- The RMA number
- A brief description of the problem(s)

Be sure to pack the product properly. Any shipping damage resulting from inadequate packaging will be the customer’s responsibility. FedEx packing or double-boxing is recommended.

Chauvet reserves the right to use its own discretion to repair or replace returned product(s).
