## Multigang and Mixed-Bulb-Type Ratings

When installing more than one Dimmer in the same wallbox, it may be necessary to remove some side sections prior to wiring (see diagram). Removal of Dimmer side sections may reduce maximum wattage, as shown in the chart below.
Mixing bulb types (using a combination of CFL/LED, and Incandescent/Halogen bulbs) will also affect the maximum ratings, as shown in the chart below.
Note: Lutron ${ }^{\text {Hi-lume }}$ A-Series LTE LED loads cannot be mixed with other loads.
*EXAMPLE: If one set of side sections is removed and you have eight 9 W LED bulbs installed (Total LED Wattage $=72 \mathrm{~W}$ ), you may add up to 300 W of incandescent or halogen lighting.
