

MicroMax VGM LED Adapters

Fully Capacity Drivers With Barrel Plugs

The MicroMax VGM Adapter is one of the smallest LED drivers available that can power up to 60W of 12 VDC or 94W of 24 VDC LED lighting. This driver has a small footprint, convenient barrel plug connectors and is incredibly efficient. It is a fantastic choice for use with indoor and outdoor LED signage applications. Its enclosure features a gilled design that works to dissipate heat more effectively than other drivers of its size. It can accept 120 or 277 VAC, so it can work in larger facilities with commercial voltage. It is ready to meet your low-voltage LED lighting needs with its full capacity output, meaning you can power your lighting without derating your power supply. It can be placed inside a cove, light fixture, SEG frame or lightbox to discreetly power your lights. It is UL listed and meets the rigorous standards for Class 2 installations.

- UL listed Class 2 power supply
- Barrel plug connectors
- Small footprint

MicroMax VGM LED Adapters

Specifications

	MicroMax VGM LED Adapter- 12 VDC - 60W	MicroMax VGM LED Adapter- 24 VDC - 94W
	VGM60W-12-EVL	VGM100W-24-EVL
Power (W)	60	94
Finish	Silver	Silver
Length (mm)	172.5	172.5
Width (mm)	43.9	43.9
Height (mm)	27.1	27.1
Input Voltage (V)	120 or 277	120 or 277
Output Voltage (V)	12	24
Input Current (mA)	1,050	1,050
Rating	UL, CUL, FCC	UL, CUL, FCC
