# ZM-GOT

couplers to build linear fixtures  
composed into multi angle patterns

**Application:**

ZM-GOT couplers are assembled short sections of profiles in the specified shapes.

Couplers are used to build linear fixtures composed of different multi angle patterns from 90 to 135 degree angles.

Covers associated with the ZM-GOT couplers extend out 40 mm past the coupler to help stabilize the connection to the extrusion.

The ZM-GOT couplers connect to the extrusions with the help of the ZM-180 connectors.

**Advantages:**

Simplifies and quickens mounting of the chosen aluminum profiles, in unconventional, multi angle patterns.

The coupler allows you to obtain a uniform line of light.

**Coupler groups:**

- angled couplers
- intersect couplers

**Construction:**

Couplers can be made using one the five profiles and one of four covers.

Profiles to choose from: LIPOD, LOKOM, LESTO, LARKO, GIZA

Covers to choose from: HS 22 frosted, HS 22 clear, LIGER 22, MUN 22
