

# MAKE YOUR NEXT PROJECT SHINE WITH ENVIRONMENTAL LIGHTS

BRIGHT IDEAS DESERVE TO SHINE.

Environmental Lights is the LED lighting expert that provides custom-designed solutions cultivated from knowledge, reliability and innovation.

Our extensive product assortment ensures you have all the necessary components to build an LED system for any lighting application. Your LED lighting system is designed with UL Listed LED lighting, controllers, drivers and other products that have been tested internally by our product engineer team for quality, reliability and consistency.

You will collaborate with a sales engineer who specializes in their vertical market and is an expert in your industry. From retail to hospitality, each sales engineer understands the current trends in your market and designs an LED solution that is tailored to your project needs.

We pride ourselves on rapid turnaround and precision, so stock items are shipped within one business day and your order is shipped accurately. We value your time and review every order to ensure all components are compatible and that custom products are made exactly to your project's specifications.

The resources and knowledge the team provides ensure you have all the support you need. From instructional videos to manuals and reports, our product information is transparent and easily accessible through our website and sales team.

Since 2006, Environmental Lights' continued growth can be attributed to the passion we put toward everything we do and launching state-of-the-art LED solutions. By partnering with Environmental Lights, your project is given the attention to detail it deserves to achieve success.
