

# Ilumipanel 180 IP Optic RGB

## Quick Reference Guide

**About This Guide**

The Illumipanel 180 IP Optic RGB Quick Reference Guide (QRG) contains the product’s connection and mounting information, as well as the menu options and DMX values.

**Disclaimer**

Refer to this product’s User Manual for detailed information and instructions. You can download the User Manual from the ILUMINARC® website: [www.iluminarc.com](http://www.iluminarc.com).

Read ALL the disclaimers and Safety Notes in this document, as well as those in the product’s User Manual before installing, operating, and maintaining this product.

**Safety Notes**

- DO NOT open the product unless instructed. It contains no user-serviceable parts.
- DO NOT look at the light source when the product is on.
- DO NOT touch the product when operating because it may be hot.
- DO NOT leave any flammable material within 50 cm from the product while operating or connected to the power outlet to minimize the risk of fire.
- DO NOT mount the product overhead without using a safety cable.
- DO NOT submerge the product below 1 m (IP67) for more than 30 minutes. Regular outdoor operation is fine.
- DO NOT operate the product if you see damage on the housing, lenses, or cables. Have an authorized technician replace the damaged parts.
- DO NOT connect the product to a dimmer or rheostat.
- ONLY connect the product to a grounded and protected circuit.

**What Is Included**

- One Illumipanel 180 IP Optic RGB
- One Power Input Cable (bare-ended)
- One Data Input/Output Cable (bare-ended)
- One Warranty Card
- One Quick Reference Guide

- Features**
- 1, 3, 4, 6, or 7-channel DMX RGB LED wash product
  - Operating modes:
    - 1-channel: Dimmer
    - 3-channel: RGB control
    - 4-channel: Dimmer, RGB control
    - 6-channel: RGB control per module (two modules)
    - 7-channel: Dimmer, RGB control, color macros, strobe, dimmer speed
  - Five distinct dimming curves
  - Dual Vector Array™ LED panel positioning
  - High-power 5 W (700~1,000 mA) RGB LEDs
  - IP67 with 316 stainless steel hardware
  - GORE™ valve
  - Cast and extruded aluminum with Integrated Cooling Enhancement™

- Options**
- Ilumicode addresser (for product configuration)

- **The RDM2go, which includes a built in ilumicode addresser along with many other useful features is now available.**
- **The Ilumicoode addresser is required for product configuration (sold separately).**

**AC Power**

This product has an auto-ranging power supply that works with an input voltage range of 100~240 VAC, 50/60 Hz.

**Power Wiring**

To provide power, you have two options:

- Connect the bare-ended, IP67-rated power cable from the product to an IP67-rated power connector.
- Use an IP6- rated junction box. If so, make sure to use IP67-rated conduit.

**Power Cable Table**

**Illuminarc recommends always using conduit for underground wiring of any kind.**

Connection	Wire (US)	Wire (Europe)	IP67 Pin
AC Live	Black	Brown	1
AC Neutral	White	Blue	2
AC Ground	Green/Yellow	Green/Yellow	3

**AC Power Junction Box Wiring**

**DMX Connection**  
**Signal Wiring**

This product provides a DMX 512 connection by using bare-ended, IP67-rated signal cable. This cable comes connected to the product.

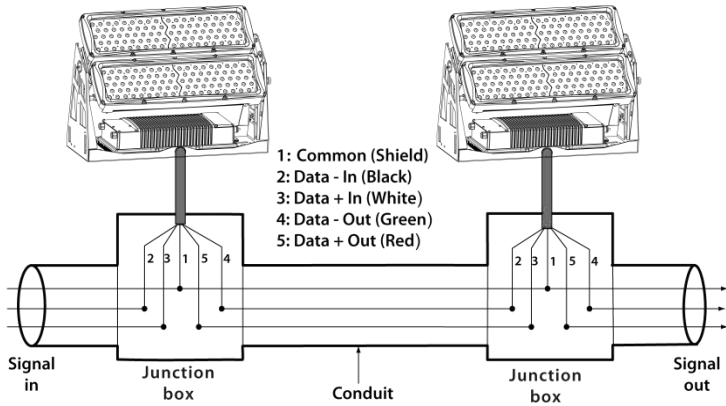

To provide the signal, you have two options:

- Connect the bare-ended, IP6- rated signal cable from the product to two IP67-rated signal connectors (DMX In and DMX Out).
- Use an IP67-rated junction box. If so, make sure to use IP67-rated conduit.

The signal cable must match or exceed the electrical characteristics of the Belden® 9841 cable for EIA RS-485 applications. You can also use CAT 5, CAT 5e, or CAT 6.

**DMX Junction Box Wiring**

**DMX Cable Table**

Connection	DMX In	DMX Out	IP67 Pin
Ground	Shield	Shield	1
Data -	Black	Green	2
Data +	White	Red	3

### Ilumicon and DMX Controllers

To control/operate the Ilumipanel 180 IP Optic RGB, use either an Ilumicon or a DMX controller. Use the standard DMX connection as shown in the section, *DMX Junction Box Wiring*, to connect this product to any standard DMX controller.

For more information, refer to the *Ilumipanel 180 IP Optic RGB User Manual*.

### Ilumicode Configuration

To configure the Ilumipanel 180 IP Optic RGB, use the Ilumicode addresser.

#### Ilumicode Connections

The following diagram shows how to connect the Ilumicode to the product.

This connection will control multiple products at the same time. In addition, all connected products will be assigned to the same DMX address.

To assign individual DMX addresses to each product, connect the Ilumicode unit to each product individually. In addition, disconnect the DMX output of the product being configured if other products are connected to it.

**You must hardwire the Ilumicode directly to the Ilumipanel 180 IP Optic RGB when programming the product.**

**Ilumicode Connection Diagram**

ILUMINARC® suggests connecting no more than 20 products in this mode, keeping the total distance to less than 60 m (197 ft). If not, you may need to use an optically isolated signal amplifier.

## Mounting

Before mounting this product, read the Safety Notes at the beginning of the *Illumipanel 180 IP Optic RGB User Manual* and follow the mounting procedures.

### Mounting Diagram

**Illumicode  
Control Panel  
Description**

Button	Function
<POWER>	Turns the Illumicode unit on.
<MENU>	Scrolls through the main level or exits from the current menu or function. <b>NOTE:</b> Press and hold to turn the unit off.
<ENTER>	Enables the currently displayed menu or sets the currently selected value into the selected function.
<UP>	Navigates upwards through the menu options and increases the numeric value when in a function.
<DOWN>	Navigates downwards through the menu options and decreases the numeric value when in a function.

**Start Address**

To ensure full access to all channels in each DMX mode, the highest recommended DMX addresses are as follows:

Mode	Address	Mode	Address	Mode	Address
<b>ARC FULL</b>	506	<b>AR1.D</b>	509	<b>SPECIAL 1</b>	507
<b>ARC1</b>	510	<b>SOLID</b>	512		

Menu Options

Main Level	Programming Levels		Description	
<b>DMX</b>	<b>001~512</b>	N/A	Sets the DMX starting address	
<b>PERSON</b>	<b>ARC 1</b>	N/A	3-channel: RGB control	
	<b>ARC 1 + D</b>		4-channel: RGB control + dimmer	
	<b>ARC FULL</b>		7-channel: RGB control + dimmer	
	<b>REMOTE</b>		Allows using the ILUMICON unit	
	<b>SOLID</b>		1-channel: dimmer	
	<b>SPECIAL 1</b>		6-channel RGB per module	
<b>CALIB</b>	<b>WHITE (1~11)</b>	<b>RED GREN BLUE</b>	<b>0~255</b>	Determines the white balance for the color macros
	<b>RGBTOW</b>			Determines the white balance when RGBTOW is active
<b>DIMMER</b>	<b>OFF</b>	N/A		Dimmer works in linear mode
	<b>DIM 1</b>			Dimmer works in non-linear mode, from fast to slow
	<b>DIM 2</b>			
	<b>DIM 3</b>			
	<b>DIM 4</b>			
<b>STATIC</b>	<b>RED</b>	<b>0~255</b>		Configures the static color and effect
	<b>GREN</b>			
	<b>BLUE</b>			
	<b>STRB</b>	<b>0~20</b>		
<b>SETTINGS</b>	<b>COLOR</b>	<b>OFF</b>	Maximum output, unbalanced white	
		<b>RGBTOW</b>	White output is as per <b>CALIB &gt; RGB</b> settings	
		<b>UC</b>	Output matches that of product's previous versions	
	<b>RESET</b>	<b>NO/YES</b>	Resets unit to factory default settings
