

96 W, Efficient, Compact Constant Voltage Class 2 LED Drivers

Nominal Input Voltage	Max. Output Power	Nominal Output Voltage	Max. Output Current	Efficiency	Max. Case Temperature	THD	Power Factor
120 to 277 Vac	96 W	12, 24, 48 Vdc	8, 4, 2 A	up to 92% typical	90°C (measured at the hot spot)	< 20%	> 0.9

Aluminum Case:
L 137 x W 25.4 x H 19.05 mm
(L 5.39 x W 1.00 x H 0.75 in)

Typical Application Diagram

ORDERING INFORMATION

ERP Part Number	Nominal Input Voltage (Vac)	Pout Max (W)	Vout Nom (Vdc)	Iout Min (A)	Iout Max (A)	Open Loop Voltage (No Load Vout Max) (Vdc)
VLM100W-12 ⁽¹⁾	120 to 277	96	12	0.2	8	12.84
VLM100W-24	120 to 277	96	24	0.2	4	25.68
VLM100W-48	120 to 277	96	48	0.1	2	51.36

Wiring Diagram

(1): VLM100W-12 is not Class 2 because the over-current protection of this model exceeds the 8A UL Class 2 limit.

FEATURES

- Very high power density of 24 W/in³
- Class 2 power supply
- IP20-rated case with silicone-based potting
- 90°C maximum case hot spot temperature
- Complies with ENERGY STAR®, DLC (DesignLight Consortium®) and CA Title 24 technical requirements
- Lifetime: 50,000 hours min at 70°C case temperature
- UL Class P
- Worldwide safety approvals c us

TYPICAL APPLICATIONS

- Strip lights
- Pendants
- Linears
- Cove Lights

96 W, Efficient, Compact Constant Voltage Class 2 LED Drivers

1 - INPUT SPECIFICATION (@25°C ambient temperature)

	Units	Minimum	Typical	Maximum	Notes
Input Voltage Range (Vin)	Vac	90	120, 230, 277	305	<ul style="list-style-type: none"> The rated output voltage for each model is achieved at $V_{in} \geq 105$ Vac & at $V_{in} \geq 198$ Vac At maximum load
Input Frequency Range	Hz	47	50/60	63	
Input Current (Iin)	A			1.05 A @ 120 Vac 0.58 A @ 230 vac 0.48 A @ 277 Vac	
Power Factor (PF)		0.9	> 0.9		<ul style="list-style-type: none"> At nominal input voltage From 100% to 60% of rated power
Inrush Current	A	Meets NEMA-410 requirements			At any point on the sine wave and 25°C
Leakage Current	μ A			400 μ A @ 120 Vac 800 μ A @ 230 Vac 920 μ A @ 277 Vac	Measured per IEC60950-1
Input Harmonics	Complies with IEC61000-3-2 for Class C equipment				
Total Harmonics Distortion (THD)				20%	<ul style="list-style-type: none"> At nominal input voltage From 100% to 60% of rated power Complies with DLC (Design Light Consortium) technical requirements
Efficiency	%	-	up to 92%	-	Measured with nominal input voltage
Isolation	The AC input to the main DC output is isolated and meets Class II reinforced/double insulation power supply <input type="checkbox"/>				

2 - MAIN OUTPUT SPECIFICATION (@25°C ambient temperature)

	Units	Minimum	Typical	Maximum	Notes
Output Voltage (Vout)	Vdc		12, 24, 48		See ordering information for details
Output Current (Iout)	A			12 Vdc: 8 A 24 Vdc: 4 A 48 Vdc: 2 A	The rated output voltage for each model is achieved at $V_{in} \geq 105$ Vac and at $V_{in} \geq 198$ Vac.
Output Voltage Regulation	%	-5		5	<ul style="list-style-type: none"> At nominal AC line voltage Includes load and current set point variations.
Output Voltage Overshoot	%	-	-	10	The driver does not operate outside of the regulation requirements for more than 500 ms during power on with maximum load.
Ripple Voltage	$\leq 5\%$ of rated output voltage for each model				<ul style="list-style-type: none"> Measured at maximum load and nominal input voltage. Calculated in accordance with the IES Lighting Handbook, 9th edition.
Start-up Time	ms			500	<ul style="list-style-type: none"> Measured from application of AC line voltage to 100% light output. Complies with ENERGY STAR® luminaire specification.

96 W, Efficient, Compact Constant Voltage Class 2 LED Drivers

3 - ENVIRONMENTAL CONDITIONS

	Units	Minimum	Typical	Maximum	Notes
Operating Ambient Temperature (Ta)	°C	-20		50	50°C is the non-derated temperature (Refer to section 6 "Output power de-rating at higher temperatures").
Maximum Case Temperature (Tc)	°C			+90	Case temperature measured at the hot spot •tc (see label in page 9)
Storage Temperature	°C	-40		+85	
Humidity	%	5	-	95	Non-condensing
Cooling	Convection cooled				
Acoustic Noise	dBA			22	Measured at a distance of 1 foot (30 cm)
Mechanical Shock Protection	per EN60068-2-27				
Vibration Protection	per EN60068-2-6 & EN60068-2-64				
MTBF	> 200,000 hours when operated at nominal input and output conditions, and at Tc ≤ 70°C				
Lifetime	50,000 hours at Tc ≤ 70°C maximum case hot spot temperature (see hot spot •tc on label in page 9)				

4 - EMC COMPLIANCE AND SAFETY APPROVALS

EMC Compliance					
Conducted and Radiated EMI		<ul style="list-style-type: none"> •FCC CFR Title 47 Part 15 Class B at 120 Vac and Class A at 277 Vac •EN55015 (CISPR 15) compliant at 220, 230, and 240 Vac 			
Harmonic Current Emissions		IEC61000-3-2	For Class C equipment		
Voltage Fluctuations & Flicker		IEC61000-3-3			
Immunity Compliance	ESD (Electrostatic Discharge)	IEC61000-4-2	6 kV contact discharge, 8 kV air discharge, level 3		
	RF Electromagnetic Field Susceptibility	IEC61000-4-3	3 V/m, 80 - 1000 MHz, 80% modulated at a distance of 3 meters		
	Electrical Fast Transient	IEC61000-4-4	± 2 kV on AC power port for 1 minute, ±1 kV on signal/control lines		
	Surge	IEC61000-4-5	<ul style="list-style-type: none"> •± 2 kV line to line (differential mode) /± 2 kV line to common mode ground (tested to secondary ground) on AC power port, ±0.5 kV for outdoor cables •Higher surge is available. Please contact your ERP representative or send an email to SaveEnergy@erp-power.com. 		
			ANSI/IEEE c62.41.1-2002 & c62.41.2-2002 category A, 2.5 kV ring wave		
	Conducted RF Disturbances	IEC61000-4-6	3V, 0.15-80 MHz, 80% modulated		
	Voltage Dips	IEC61000-4-11	>95% dip, 0.5 period; 30% dip, 25 periods; 95% reduction, 250 periods		

Safety Agency Approvals

UL	UL8750 listed Class 2
cUL	CAN/CSA C22.2 No. 250.13-14 LED equipment for lighting applications
CE	IEC61347-2-13 electronic control gear for LED Modules & EN55015 (EMC compliance)

Safety

	Units	Minimum	Typical	Maximum	Notes
Hi Pot (High Potential) or Dielectric voltage-withstand	Vdc	2500			<ul style="list-style-type: none"> • Insulation between the input (AC line and Neutral) and the output • Tested at the RMS voltage equivalent of 1767 Vac

96 W, Efficient, Compact Constant Voltage Class 2 LED Drivers

5 - PROTECTION FEATURES

Under-Voltage (Brownout)

The VLM100 series provides protection circuitry such that an application of an input voltage below the minimum stated in section 1 (Input Specification) shall not cause damage to the driver.

Short Circuit and Over Current Protection

The VLM100 series is protected against short-circuit such that a short from any output to return shall not result in a fire hazard or shock hazard. The driver shall hiccup as a result of a short circuit or over current fault. Removal of the fault will return the driver to within normal operation. The driver shall recover, with no damage, from a short across the output for an indefinite period of time.

Internal Over temperature Protection

The VLM100 is equipped with an internal temperature sensor on the primary power train. Failure to stay within the convection power rating will cause the driver to shut down. The main output current will be resumed when the temperature of the built-in temperature sensor cools adequately.

Output Open Load

A no load condition will not damage the VLM100 or cause a hazardous condition. The driver will remain stable and operate normally after application of a load. When the LED load is removed, the output voltage of the VLM100 series is limited to 7% about the output voltage of each model.

Over Power Protection

The VLM100 will shut down and auto recover in the event of an over-power condition. This condition will cause no damage to the power supply.

Input Over Current Protection

The VLM100 series incorporates a primary AC line fuse for input over current protection.

6 - OUTPUT POWER DE-RATING AT ELEVATED TEMPERATURES

The VLM100 series can be operated with cooling air temperatures above 50°C by linearly de-rating the total maximum output power (or current) by 2.5%/°C from 50°C to 70°C (see figure 1).

Figure 1

96 W, Efficient, Compact Constant Voltage Class 2 LED Drivers

7 - PREDICTED LIFETIME VERSUS CASE AND AMBIENT TEMPERATURE

Lifetime is defined by the measurement of the temperatures of all the electrolytic capacitors whose failure would affect light output under the nominal LED load and worst case AC line voltage. The graphs in figure 1 are determined by the electrolytic capacitor with the shortest lifetime, among all electrolytic capacitors. It represents a worst case scenario in which the LED driver is powered 24 hours/day, 7 days/week. The lifetime of an electrolytic capacitor is measured when any of the following changes in performance are observed:

- 1) Capacitance changes more than 20% of initial value
- 2) Dissipation Factor ($\tan \delta$): 150% or less of initial specified value
- 3) Equivalent Series Resistance (ESR): 150% or less of initial specified value
- 4) Leakage current: less of initial specified value

Figure 2

Figure 3

Notes:

- The ambient temperature T_{ambient} and the differential between T_{ambient} and T_{case} mentioned in the above graphs are relevant only as long as both the driver and the light fixture are exposed to the same ambient room temperature. If the LED driver is housed in an enclosure or covered by insulation material, then the ambient room temperature is no longer valid. In this situation, please refer only to the case temperature T_{case} .
- It should be noted the graph "Lifetime vs. Ambient Temperature" may have an error induced in the final application if the mounting has restricted convection flow around the case. For applications where this is evident, the actual case temperature measured at the T_c point in the application should be used for reliability calculations.

9 - MECHANICAL DETAILS

- Packaging Options:** Aluminum case
- I/O Connections:** Flying leads, 18 AWG on all leads, 203mm (8 in) long, 105°C rated, stranded, stripped by approximately 9.5mm, and tinned. All the wires, on both input and output, have a 300 V insulation rating.
- Ingress Protection:** IP20 rated
- Mounting Instructions:** The VLM100 driver case must be secured on a flat surface through the two mounting tabs, shown here below in the case outline drawings. We recommended mounting the VLM100 on a baseplate with dimensions of 195 x 60 x 3 mm (7.68 x 2.36 x 0.12 in.).

10 - OUTLINE DRAWINGS

- Dimensions:** L 137 x W 25.4 x H 19.05 mm (L 5.39 x W 1.00 x H 0.75 in)
- Volume:** 66.3 cm³ (4.04 in³)
- Weight:**

All dimensions are in mm
